

# LARGE-CAP ALPHA

Managed Accounts  
2nd Quarter 2023

For Detailed Weekly Analysis: [www.qtrcapital.com/market-analysis](http://www.qtrcapital.com/market-analysis)

## FIRM FACTS

QTR Capital Management is a registered investment advisor that runs five actively managed, long equity strategies, and a fixed-income alternative fund that uses dividend paying stocks, leverage and options-based hedges.

## STRATEGY OVERVIEW

The Large-Cap Alpha strategy buys reasonably valued stocks with a market cap greater than \$10 billion that exhibit strong earnings growth and price momentum.

## INVESTMENT APPROACH

An actively managed investment approach that identifies stocks via a proprietary 4-level scanner comprising technical, fundamental and factor-based quantitative analysis. This strategy buys the stocks of fundamentally strong companies with strong positive earnings growth that have moved into high probability bullish technical & statistical setups.

## KEY DIFFERENTIATORS

- Leverage quantamental analysis comprising technical, fundamental and statistical predictors.
- Focus on reasonably valued, fundamentally strong companies with strong positive earnings growth.
- Follow strict entry rules where new positions are opened at high-probability technical setups, where momentum typically begins to accelerate.
- Adhere to well-defined exit rules to protect capital and a high percentage of gains when exit signals are triggered. Short-term cash levels can approach 70% during times of high volatility to protect capital.
- Strong portfolio statistics vs. benchmark such as lower risk, low correlation to the benchmark Index (Beta), high Sortino Ratio, high UP Market Capture, and less severe drawdowns during market corrections.

## PORTFOLIO MANAGERS

### Brad Reinard

CIO & Senior Portfolio Manager  
Adj. Professor, Chapman University School of Business  
B.S. Columbia University  
MBA - Univ. of Chicago Booth School of Business  
25+ years industry experience

### Enrico Lombardi

Portfolio Manager  
17 years industry experience

# LARGE CAP ALPHA

Managed Accounts

2nd Quarter 2023

For Detailed Weekly Analysis: [www.qtrcapital.com/market-analysis](http://www.qtrcapital.com/market-analysis)

1 Benchmark and gross fund returns are calculated from fund inception date of Feb 1, 2019. Benchmark and Fund returns represent price returns.

2 Active share is calculated as 100% less percent of overlap between fund holdings and S&P 500 benchmark components.

3 Up Market Capture is calculated as ratio of monthly fund performance to monthly benchmark performance during months when benchmark performance was positive. This calculation also includes values for months where benchmark performance was negative, but fund performance was positive.

4 Alpha is calculated as fund excess gross returns above the benchmark return since inception.

For detailed weekly analysis visit [www.qtrcapital.com/market-analysis](http://www.qtrcapital.com/market-analysis). This information is for illustrative purposes only, is subject to change at any time and should not be considered investment advice or a recommendation to buy or sell any particular security. Data as of June 30, 2023 unless otherwise indicated. The benchmark is the S&P 500 Large-cap index, unless otherwise indicated. The information is based upon the total assets of a discretionary account comprising the QTR Capital Management Large Cap Alpha strategy for the periods shown. Past Performance does not predict or guarantee future results. Performance inception date for auditable results begin Feb 1, 2019. Gross performance returns are presented before investment management fees, but after all trading expenses. Net-of-fees performance returns are presented net of the investment management fees and trading expenses. The performance presented represents past performance and is no guarantee of futures results. Performance is compared to an index, called the benchmark. The volatility of an index varies greatly, and long positions in this strategy are not made directly in an index. Market conditions vary from year to year and can result in a decline in market value due to material market of economic conditions. Consider the investment objectives, risks, and charges and expenses of the QTR Capital portfolios carefully before investing. Individual accounts may vary due to restrictions, substitutions and other factors. Portfolio holdings may change at any time without notice. The specific securities do not represent all the securities that QTR Capital Management has purchased, sold or recommended for clients over the past year. The reader should not assume that the investments in the securities listed above were or will be profitable. This report contains no recommendation to buy or sell any specific securities and should not be considered investment advice of any kind. This information is not provided in a fiduciary capacity. The information provided does not consider the specific objectives or circumstances of any particular investor or suggest any specific course of action. Investment decisions should be made based on an investor's objectives and circumstances and in consultation with a licensed advisor. CFA and Chartered Financial Analyst are registered trademarks owned by CFA Institute. Actual results may differ from listed results depending upon the size of the account, investment objectives and restrictions, the amount of transaction and related costs, the inception date of the account and other factors. All investments carry a certain degree of risk and it is important to review investment objectives, risk tolerance, tax liability and liquidity needs before choosing an investment style of manager. There are specific risks associated with small company investments including higher volatility, than large-cap companies. ADRs do not eliminate currency and economic risks for the underlying shares in another country. Small or mid-cap style investing may fall out of favor and underperform growth or other style investing during given periods of time.
